THE EVERGREEN INGREDIENTS TO YOUR OFFICE: GLASS & ALUMINIUM

Mr. Chetan Jangle
Business Head
(SAARC Region)
OTIC-PARTICION

OTIC is responsible organisation for the environment & as well as launching new products as per trends. We found that glass is, and remains, a key building material in architecture. Why? It lets the natural light through, it keeps its appearance and integrity over time (it does not turn yellow), its maintenance is easy, it is 100% recyclable, it helps to create a feeling of well-being in a room, it is available in several finishes, colours and patterns and so much more!

We also find that aluminium, whether for outdoor shelters or storage furniture or cabinet doors and sliding doors, is always trendy. It is also increasingly appreciated by designers and customers who like industrial, modern or contemporary style. Other popular features of aluminium are its durability and adaptability. Also, aluminium goes with other materials like wood, concrete, glass and composite.

OTIC Glass Partition as functional application support the acoustic properties in office space along with the privacy desired in office. In modern office space all the designs are modular & the client need the space with good design with best of functional properties. Glass not only support Aesthetics but also function like it is better for good health or people working in space. The maximum transparency in office brings fresh minds as well as better optimal health of employees.

For optimisation of space we have large range of Sliding partitions as well as door options. With OTIC-Vetro we have been promoting the acoustic modular solid partitions which brings the complete modularity on office & commercial spaces. We are committed to designers/ clients for best of the global solutions with our innovative product range & best of service in India.

QUOTE OF THE MONTH

"When Henry Ford made cheap, reliable cars, people said, 'Nah, what's wrong with a horse?' That was a huge bet he made, and it worked."

”

~ Elon Musk
