Project: 'The Walk' Food Court
Location: Aerocity, New Delhi

PROJECT OF THE MONTH | BHARTI FOOD COURT 'THE WALK' (AEROCITY DELHI), DESIGNED AND EXECUTED BY CHERRY HILL INTERIORS

Bharti Food court 'The Walk' known as the "Food Capital" at Worldmark Aerocity, by Bharti Realty is the popular food court at a distance of less than 10 minutes from the international airport and 20 minutes from South Delhi and Gurugram.

The 'Walk' is at a central, accessible location, offering a wide range of options in F&B and retail. With many food counters and a large number of standalone restaurants, Food Capital makes for a space which truly offers something for everyone.

The design has a stunning external presence & thoughtfully created interiors, spacious elevators and great views across the floors.

'The Walk' is not like a traditional enclosed food court. It has a double height ceiling with a sunroof allowing in plenty of natural light, a water body for added relaxed ambience using handmade tiles and a cooling atmosphere because of the abundance of plants all around it.

The space is also a fusion of food counters and standalone restaurants offering a global array of cuisines. Food Capital has specially curated spaces where events are hosted on a regular basis including plays /stand up acts / live bands etc.

It is safe, it offers a great ambience, a number of retail and F&B options. The concept of an 'all-in-one place' makes it the perfect leisure destination.

There are more than twenty restaurants/ clubs/ bars/ cafes at 'The Walk' offering cuisines with a wide range of palette. The cuisines range from regional Indian to Pan-Asian, French, Italian, Continental and other global cuisines.

Most of the restaurants have been created only from a fine dine perspective. It focuses on best experience – be it food or ambience or even nightlife. Authenticity, curation, ambience, quality of food is what a customer is looking for and we provide exactly the same.

SPECIAL FEATURE | SMARTMIRRORS TO MAKE VISITOR EXPERIENCE ZONES

As the place where visitors and clients often gather their first impressions, office reception areas and lobbies are super influential. That means having uncomfortable, worn out chairs, boring walls, and terrible interior design is an absolute no-no for these rooms. And when everything in your life is smart, so should be the office reception. In fact what speaks young, dynamic and tech savvy than having a smart office reception.

We view Receptions not only as places to make visitors wait, but as dynamic vibrant spaces that should become the visitor experience zones! In a day and age where everything competes for attention, your reception needs to have state of the art technology to enable a truly impressive experience for your visitors. One such technology that can revolutionise your receptions experience is MiazaMirror.

Miaza Mirror is a premium patented Smart Mirror that reimagines the mirror to suit the 21st century. Smart mirror is one of the growing priorities of modern days' community. It is an alternative to the traditional mirror being used in malls, offices, automobiles, and homes. The smart mirror offers an effortless digital experience allowing the user to get access to the information that you want them to see. You can interact with the Mirror with accompanying App, Speech or Gesture. Imagine saying "Show a demo reel of the great work done here" and the Mirror automatically shows a clip of your companies excellent work! This is a reality with MiazaMirror.

Normally MiazaMirror looks like a normal premium mirror. Step in front of it and the AI Driven Face Detection turns it on. It can then be custom programmed to provide different engaging experiences. For example the Mirror can act as a virtual receptionist, taking visitors name, pictures and producing a visitor pass and further also informing your office members about the guest. Or it can show your product range and your offerings and advertisements. The Mirror can also help them order beverages while they wait. Mirror can help people try out experiences and even give them augmented reality tours of your offices or factories. MiazaMirror is also videoconferencing capable allowing your visitors to connect with your remote offices.

Every Mirror comes with custom content and experiences created just for your company. The team of AI Engineers, work to build your visitor experience zones centered and controlled by the Mirror. The MiazaMirror also has its own IoT backbone allowing it to control lights, fans etc by speech or app. Mirror also functions as a SelfieStation allowing users to experience your technology and take augmented reality pictures and gifs with the Mirror. At the backend the mirror maintains complete records of number of visitors, their sex and age group (determined through AI), their names etc. This provides your office with analytics about your visitors while providing them with engaging experience.

MiazaMirror also has several other uses. For example, teams report greater learning through immersion and interactivity. Training teams and employees on MiazaMirror is powered by the augmented reality training modules, seamless video conferencing and performance tracking. With MiazaMirror training is more impactful, lasts longer and is a community experience unmatched by any existing technology. No office in the 21st century can simply rely on conventional good design. MiazaMirror can be the smart platform around which you can construct your companies Smart Visitor Experience Zone.

INDUSTRY SHOWCASE | CONSTRUCTION SPECIALTIES

Construction Specialties (“CS”) is one of the world’s most trusted manufacturers of high-performance specialty architectural building products. With headquarters in New Jersey, USA, CS has over 2000 employees worldwide and representation and/or factories in over 30 countries. CS recently celebrated its 70th anniversary and is still a family-owned business.

CS India, established over 15 years ago and based in Mumbai, is a wholly owned subsidiary of CS and follows strict quality and performance guidelines. CS India provides solutions to complex building and design challenges that India’s architects, designers, building owners, facility managers, and contractors face every day, ranging from protecting buildings from monsoon rains with storm-resistant louvers to protecting building interiors and

exteriors with custom expansion joint systems, Acrovyn® Wall Protection, and entrance flooring systems.

CS India has sales representatives and dealers across India and will be happy to help make your next project a success! For more information on how CS India can assist you, please contact us at:

Mr. Chetan Jangle
Country Manager
email: cjangle@c-sgroup.com

Just a few of our technical product offerings are listed below. For a preview of the entire CS product line offering, including explosion vent panels, sunscreens, and Acrovyn Doors, please visit our website: www.c-sgroup.com.

Architectural Louvers

Our diverse line of louvers can meet the air flow requirements of any project. CS storm-resistant louvers are up to 100% effective at stopping wind-driven rain. CS also offers acoustical louvers, blast resistant louvers, and vision barriers. Our louvers are available in a variety of profiles and can help achieve the aesthetic you want without sacrificing performance or protection.

Acrovyn® Wall Protection

Protect interiors in hospitals, airports, and other buildings with Acrovyn® semi-rigid sheet, corner guards, hand rails, and crash rails. Acrovyn sheet is also an excellent means to protect doors and maintain your facility looking like new for years. Our Acrovyn wall protection line has a range of colors, wood grains, shapes, & thicknesses as required to meet the specific needs of your project.

Entrance Flooring Systems

CS’ wide range of entrance flooring systems creates a positive visual impact on visitors from their first step into your building. CS mats and stainless steel grids reduce maintenance costs by trapping dirt, debris, and moisture before it enters a facility. Keeping your building clean, reducing liability from falls, making a memorable first impression are all easily achievable with CS’ entrance flooring systems

Expansion Joint Covers

CS’ experience and expertise regarding thermal, wind-sway, settlement, and seismic building movement allows us to offer an extensive line of high-quality expansion joint cover (“EJC”) systems that are unmatched in the industry. Our EJCs can be used in floor, wall, ceiling, exterior, parking and stadium applications to meet your project’s unique movement criteria.
